

(PL 38)

Tyres with the same dimension but from different manufacturers or even models usually also have a different internal volume. So you can't say that e.g. a 90/90-21 mousse fits into a 90/90-21 tire.

This table lists all tyre-mousse combinations that have been tested by us. This guarantees which mousse is best suited to which tyre.

TYPE DIMENSION	EXTREME	SOFT	NORMAL	HARD
X-GRIP - TYRES				
MACHETE 90/100-21			EV-1
